

FOR IMMEDIATE RELEASE

July 24, 2009

Contact: Sam Moore, John James Audubon Bridge Spokesperson
Phone: 1.866.TIMED LA

Portion of Highway LA 981 to close beginning Monday, July 27

Both lanes to close for six days

New Roads, La. – Both lanes of Highway LA 981 just south of Big Cajun II Power Plant to approximately one-quarter mile past the project site will be closed from Monday, July 27, at 6 a.m. through Saturday, Aug. 1. The closures are necessary for installation of steel girders for the high-level approaches of the John James Audubon Bridge. Both lanes will re-open Aug. 1, at 7 p.m.

The John James Audubon Bridge project is a new Mississippi River crossing between Pointe Coupee and West Feliciana parishes in south central Louisiana. The bridge--proposed to be the longest cable-stayed bridge in North America--will replace an existing ferry between the communities of New Roads and St. Francisville.

The bridge will also serve as the only bridge structure on the Mississippi River between Natchez, Mississippi and Baton Rouge, Louisiana (approximately 90 river miles).

The Bridge is part of The TIMED Program (www.timedla.com), the single largest transportation program in state history. The Program is designed to enhance economic development in Louisiana through an investment in transportation projects and is funded by a dedicated \$0.04 per gallon gasoline and motor fuels tax. It was created by Act 16 of the 1989 Louisiana Legislature and was approved by a vote of the people. For additional information, please contact 1-866-TIMED LA or visit www.timedla.com.
